Sunflower (Helianthus)		Mid June					Early Oct					

Where can I get locally grown flowers, foliage and woody stem products?

Ask your flower wholesaler about sourcing locally grown flowers and foliage.

Please note that many products listed are still being produced in relatively small quantities. Also, production is subject to seasonal weather variations and other cropping and market factors, therefore supply of produce cannot always be guaranteed on a consistent basis. This may be overcome by pre-ordering early in the season. The crop can then be grown to meet your needs.
