26 October	37
02 November	30
09 November	25
Total to date	137

Positive Results

Species of Bird (no. of birds)	Location	Month	Result
None to date			

It is normal for a proportion of wild birds to carry low pathogenic avian influenza viruses so it would not be unusual to detect some LPAI viruses over the course of the survey. These are normally of little significance to human or animal health.
